

The Perfect Match:

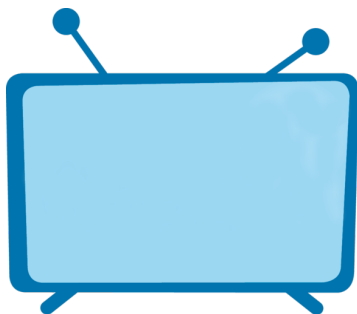

PreSens' Measurement Devices &
CR1000X Data Logger by
Campbell Scientific

Dear Dr. Max Mustermann

You need to measure oxygen in an application related to weather, water, energy or soil?
If so, PreSens can now offer you the perfect match:

Combine your PreSens' measurement devices with the widely used data logger CR1000X by Campbell Scientific, as PreSens developed appropriate solutions for easy and reliable connections of both products.

To give you a better idea of how to connect PreSens' devices to the Campbell Scientific Data Logger, have a look at our [video](#), showing an exemplary connection of our [OXYBase® product series](#) to the CR1000X.

The OXYBase® combines an electro-optical module and an oxygen sensor in a waterproof probe, which makes it the perfect tool for applications in aquacultures, environmental research or marine biology.

For further use of the OXYBase® with the data logger CRBasic script solutions for three possible interfaces were developed and can be [downloaded](#) for free from our webpage, delivering all vital data that is coming from the measurement system. The scripts can be transferred to your data logger with the free software provided by Campbell Scientific.

You would want to connect one of our other devices with the CR1000X? Just [contact us!](#) - We can't wait to hear from you ...

Upcoming Exhibitions

[>> Back](#)

Oct 14 - 17, 2019

[TERMIS-AP 2019](#)

Brisbane, Australia, Brisbane Convention & Exhibition Centre, Booth 12

Oct 27 - 30, 2019

[RAFT 2019](#)

Bonita Springs, USA, Hyatt Coconut Point, Booth 36

Oct 27 - 31, 2019

[MicroTAS 2019](#)

Basel, Switzerland, Congress Center Basel, Booth 20
